WORK EXPERIENCE

XIFIN

San Diego, CA

BI Integration Engineer

Aug 2024 – Present

- Migrate and validate **100+ legacy SAP Data Services ETL workflows in Azure Data Factory** as part of an enterprise ETL modernization initiative.
- Design and optimize complex **Amazon Redshift SQL supporting 250+ database objects**, including staging tables, views, materialized views, and data transformations to improve data reliability and maintainability.
- Onboard **25+ customer environments** by provisioning and synchronizing database schemas and objects, configuring ETL workflows, and performing end-to-end validation before production deployment.
- Monitor and support production ETL workflows across **150+ customer environments**, ensuring scheduled data integrations complete successfully and investigating failures affecting downstream processing.
- Troubleshoot production ETL failures caused by **network connectivity, memory/resource constraints, data-quality issues, and job dependencies**, performing root-cause analysis and **adjusting job schedules based on system resource availability**.

ORTHOPIX/SEASPINE

San Diego, CA

Data Engineer

Oct 2022 – Aug 2024

- Contributed to the migration of legacy **IBM DataStage ETL workflows to Azure Data Factory**, rebuilding and validating pipelines as part of the organization's data platform modernization.
- Supported **data warehouse modernization efforts involving Oracle, SQL Server, and Snowflake**, validating data flows and helping transition legacy data processes toward a cloud-based architecture.
- Translated **business and technical requirements into ETL workflows and data integrations**, partnering with Data Architects and BI Developers to support downstream reporting and analytics.
- Created **technical documentation covering ETL mappings, workflow dependencies, validation procedures, and production-support processes**.

SEASPINE

San Diego, CA

Business Intelligence Intern

Jun 2022 – Sep 2022

- Maintained and supported **Oracle APEX and IBM Cognos Analytics**, troubleshooting application and reporting issues to ensure reliable business operations.
- Built **Python-based data validation solutions** to identify file-count discrepancies and automate reconciliation, reducing manual validation and troubleshooting effort by **~50%**.
- Wrote and optimized **Oracle SQL** for data extraction, transformation, validation, and troubleshooting across ETL and reporting workflows.

EDUCATION

UNIVERSITY OF CALIFORNIA SAN DIEGO

San Diego, CA

Master of Data Science

Jan 2025 – Dec 2026

UNIVERSITY OF CALIFORNIA SAN DIEGO

San Diego, CA

Bachelor of Science in Mathematics-Computer Science

Sep 2018 – Jun 2022

SKILLS

Programming: Python, SQL, Java, Scala

Databases & Warehouses: Amazon Redshift, Oracle, SQL Server, Snowflake

Data Engineering: Azure Data Factory, SAP Data Services, IBM DataStage, Apache Spark, Talend, Azkaban

BI & Analytics: Power BI, IBM Cognos Analytics, Oracle APEX, SAP BusinessObjects BI

Tools: Linux, GitHub, Jupyter, Visual Studio Code
